The Nordic Council of Ministers invites you to a webinar on **Nordic Climate Action – The views of the Nordic citizens and the collaboration between the Nordic countries**. Join us to learn more about what the average Nordic citizens' views are on climate action and how the Nordic countries will increase their cooperation on climate action.

At the webinar, we will launch the report **Democracy and climate commitment in the Nordic countries: common direction, different solutions**. The report shows that eight out of ten Nordic

citizens are worried about climate change and think that the Nordic region should be a pioneering region for climate action. Furthermore, environment and climate is perceived as the most important issue for the Nordic cooperation.

It is clear that the time has come to use the strength of the Nordic region in the interest of the environment and climate. Our Vision 2030, the new vision for the Nordic cooperation, is to make the Nordics the most sustainable and integrated region in the world by 2030.
